SYNTHETIC SAP - FOR SOFTWARE TESTING ONLY

4.1 Analysis Population

The ITT population includes all randomized patients.

4.2 Treatment Arms

Subjects are assigned to Arm A or Arm B.

6.4.1 Overall Survival

Overall Survival (OS) is time from randomization to death from any cause.

Overall survival will be analyzed using the Kaplan-Meier method.

Median OS (months) and 95% CI will be reported by treatment arm.

Table columns: Arm A and Arm B.

Table rows: Median OS (months) and 95% CI.

Footnote: Estimates are based on the Kaplan-Meier method.
